

In this account

user: iworkwithyou@gmail.com

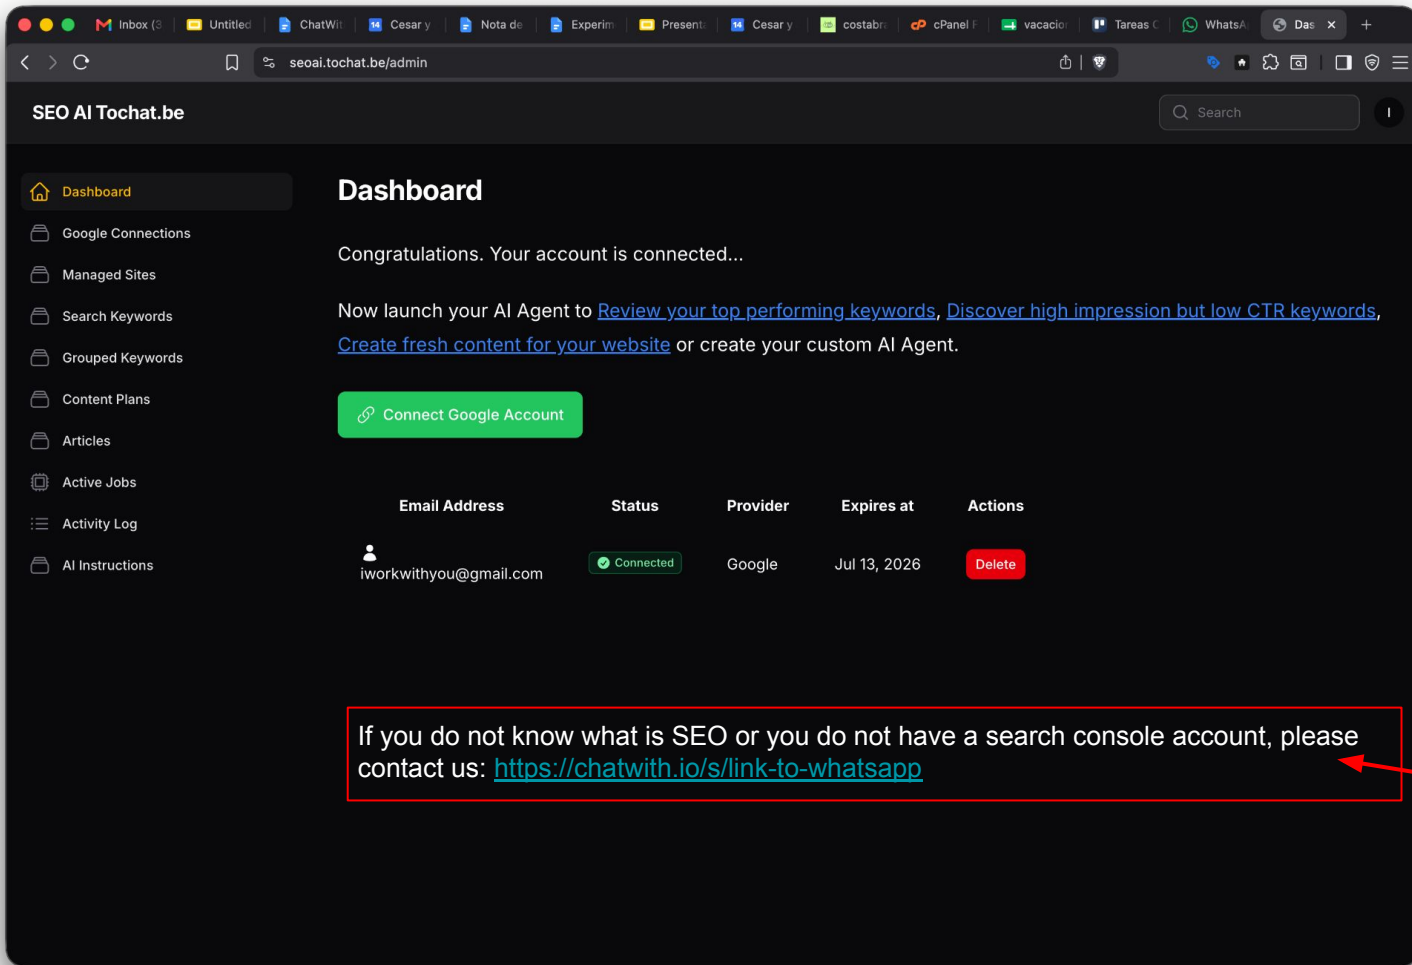

pass: iworkwithyou@

What MUST happen:

1. User connects the account and connects the sites.
2. We import all the keywords and we show progress. Right now this step is very confusing and slow.
3. With all the keywords imported we do two things by default:
 - a. We give you the top Keywords and we give you extra text to add to your site.
 - b. We give you high impression keywords with low or zero clicks and we give you text to add to your website.
4. All these must happened as FAST as possible and showing clear progress to the user.

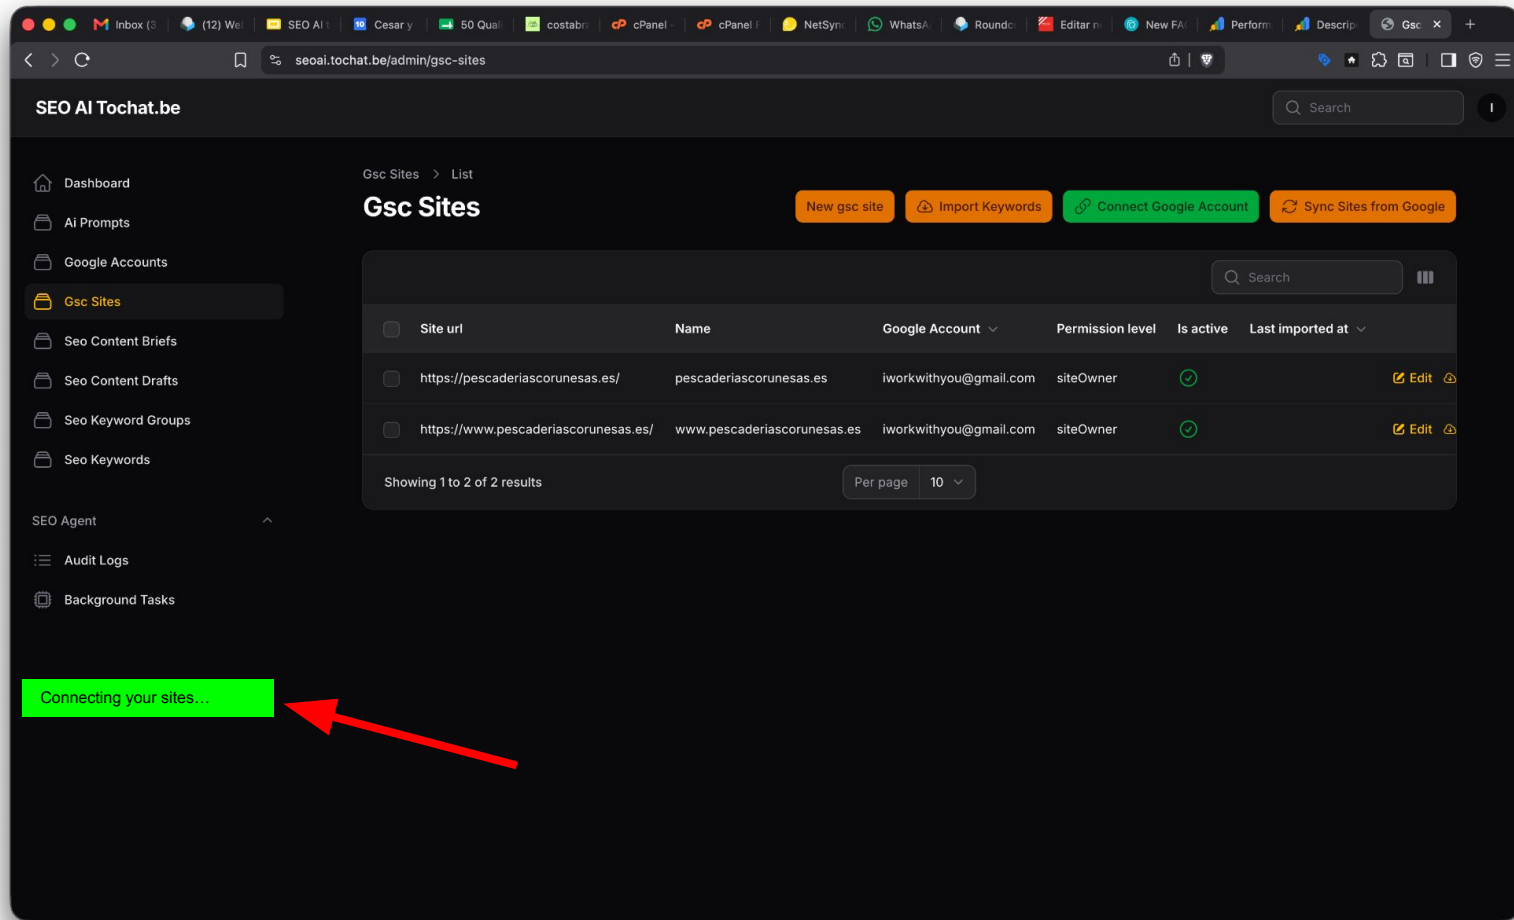

Please focus on making this links to work.

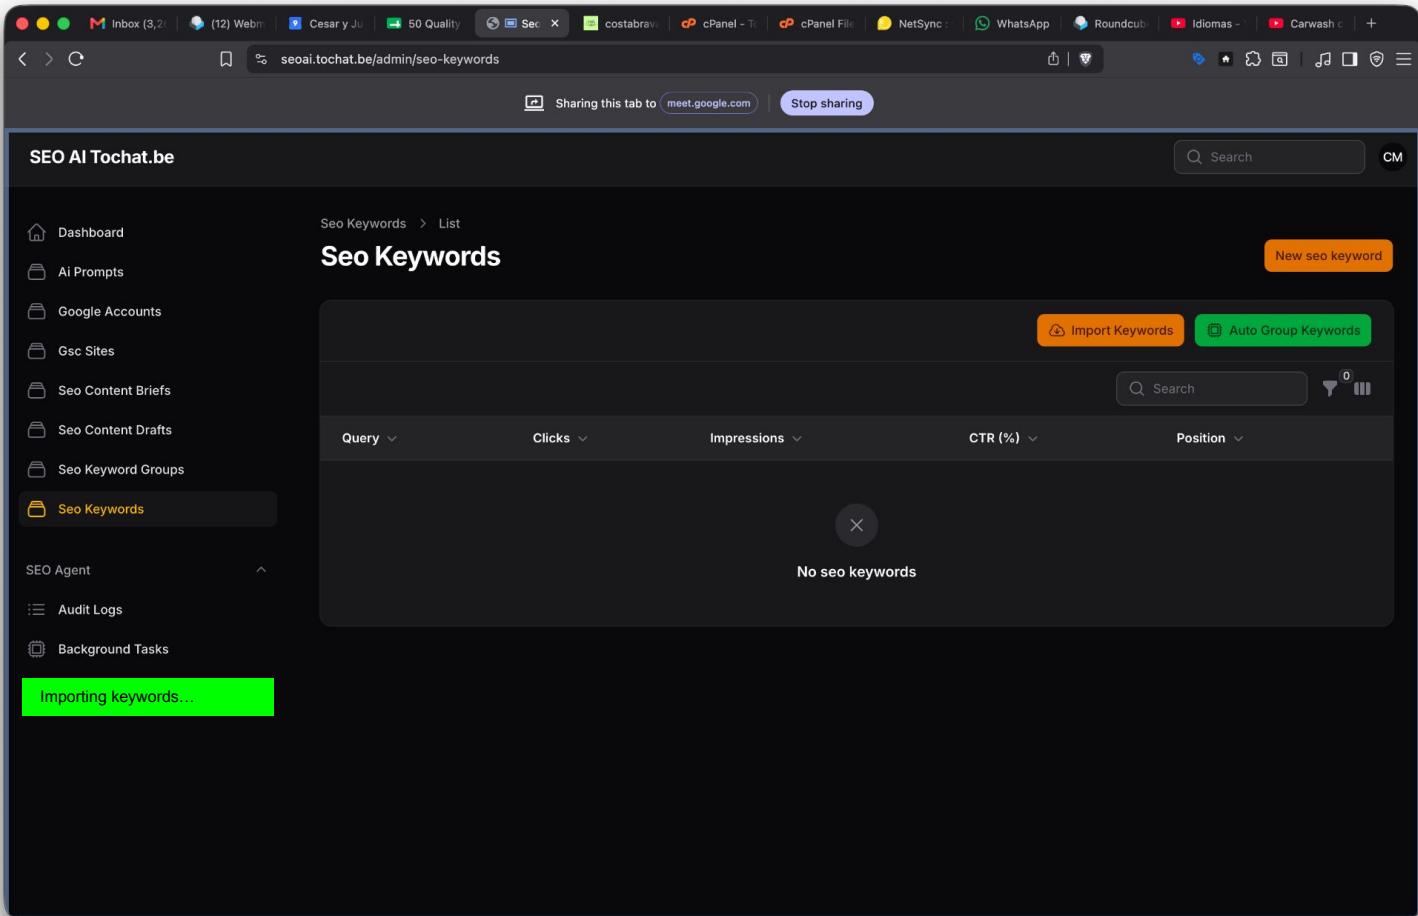

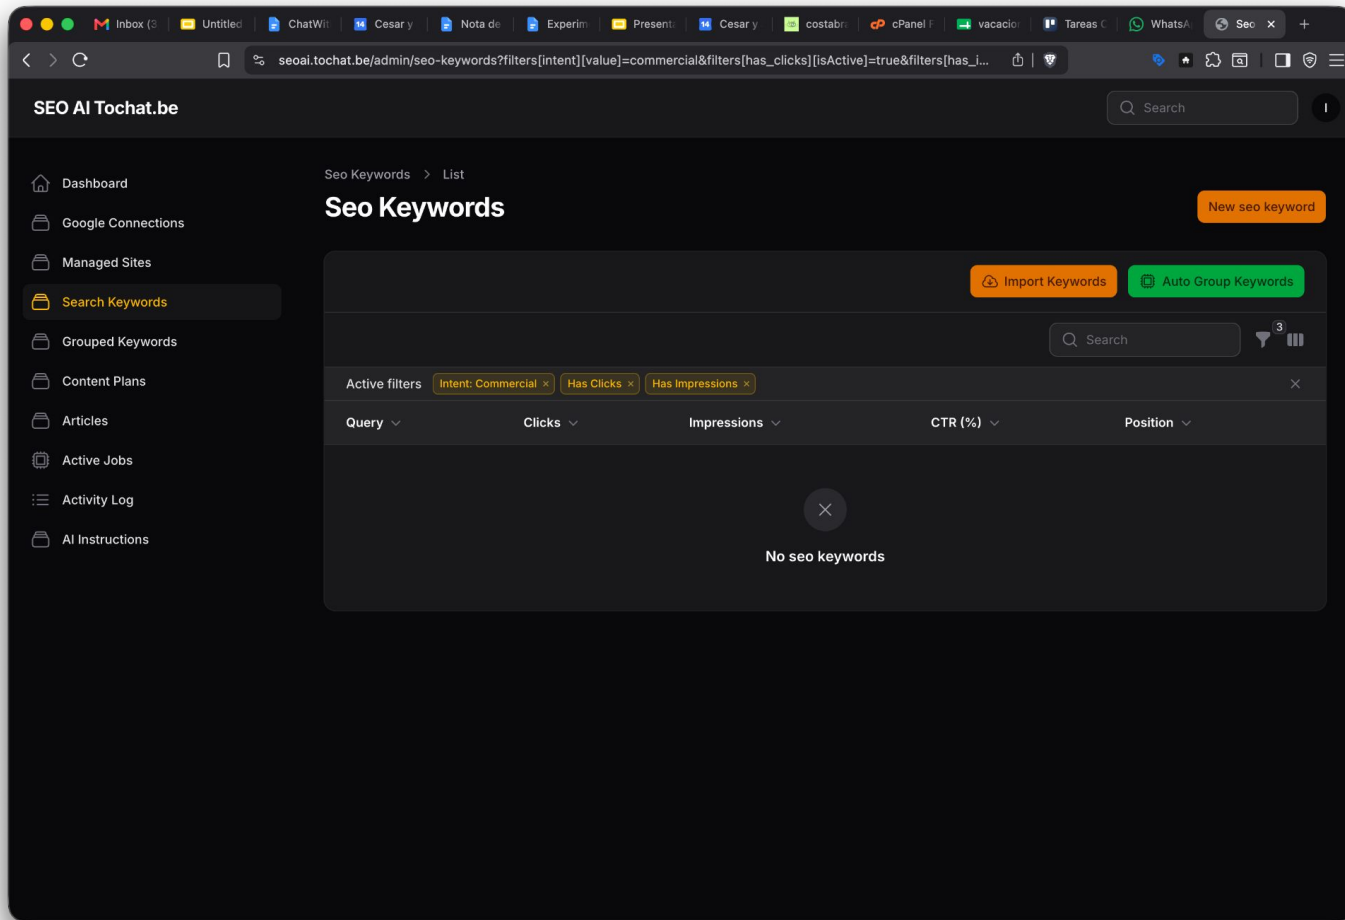

If you do not know what is SEO or you do not have a search console account, please contact us: <https://chatwith.io/s/link-to-whatsapp>

Please add this line.

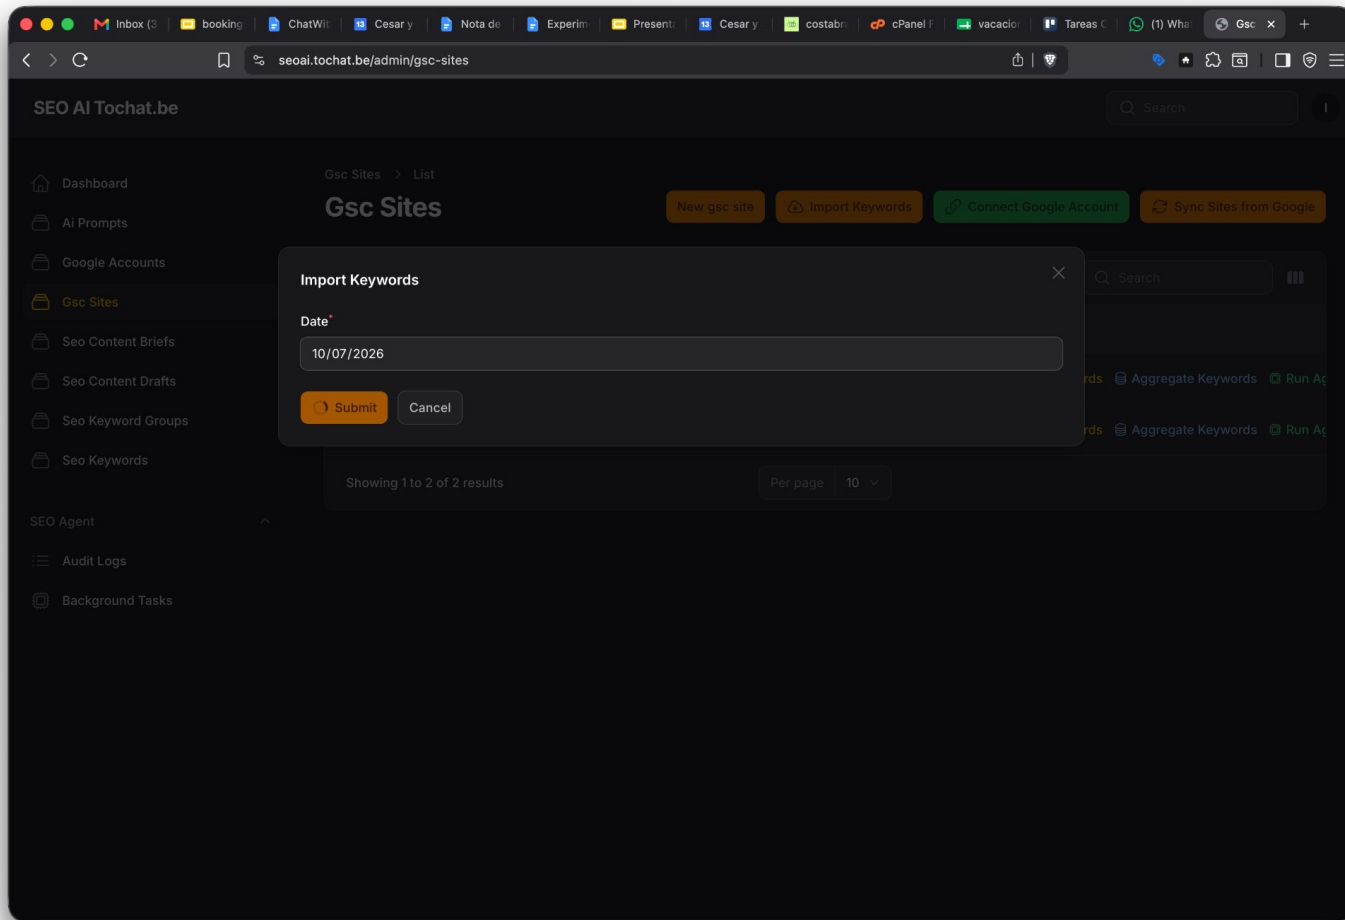

This screen sometimes takes a while to load. Please review and add a loading bar or something. Because is very confusing when you do the connection but nothing shows up.

Filters not working

When you import Keywords, **no need to choose the date**. I do not think it is relevant and it is confusing.

When you import Keywords you import the most recent set.

☐ proveedor de alimentos	0	1	0.00	13.0	Edit
☐ pez emperador chile	0	1	0.00	2.0	Edit

I did it and I do not see the new keywords.

I did a **group of Keywords** and I do not understand how it works or what is the use for it.
